

# Humanity and Cosmic Law

*What is being suggested herein, is a more conscious awareness of that which is beyond the present thinking of human potentialities. A Prophecy is told, from within a point in time where the mass consciousness displays through its perceptions of life at that time that the prophetic reading was given. The 'Third Peril' for example is just such a reading! Yet it is not written in stone, it is not set into any form of fixation or material manifestation yet through the Concrete Mind of mankind. It remains only an Abstraction of the Mind Potential. However, if humanity does not look at this particular 'Peril' more fervently based upon Divine Truth, from the Higher Perception of Cosmic Law, then it shall indeed come to pass! Just as the 'Perils of Washington's Visions', where one and two were made manifest. What then is the Law of Prophecy?*

**Law of Prophecy** – The only true future that exists is the desire or will of the Source of all Creation that none shall be lost and that the future is happening, unfolding in the 'I AM' Presence of the Now Moment. Sacred geometry is an aspect, a Manifestation of God's Love. People who are able to tune into the Akashic Records and into Universal Consciousness sometimes use Sacred Geometry to draw a line from the supposed past, present and then to the future. The ability to Use Sacred Geometry, or indeed, Star Encodements, comes with the Raising of Vibration to such a degree that the personality gains the Right to Assess Akasha for the good of another or self. When Reading the Energy going to the future of people on Earth, one must keep in mind that this Energy Changes the very Fabric of Life from that Now Moment to the next Now Moment. While those Powerful Prophets of old were correct in Their time and some of what they said has held to present day, much of Their Prophecies have lost relevancy. Just by hearing prediction, we change the outcome to some degree, or indeed totally dissolve it.

**Law of the Now Moment** - Past, present and future are illusory phenomena conceived by the conscious mind. They do not exist in an Eternal Universe where there is no Real Framework or Reference Point on which time may be based. Everything that is occurring in the Universe is occurring 'Now' all at once. All Power, Freedom, Happiness, Joy, Peace, etc., that we seek, should be sought in the Now, not in some uncertain date. We have no power in the past or in the future. Now is the Only Moment of Power to implement Change, not in the past or the present. Now, is the only time that we can act. Why should we worry over a 'future' problem that has not occurred and has the probability of not occurring? Why should we relive traumatic experiences of the past, when we should be focusing on the Now Moment with its many Opportunities and Possibilities of Expansion, Understanding and Growth? Ancient Sages tell us to live a day at a time, that is, not to live in the past or in the future, for by dwelling in those two states we would simply miss the Opportunities that are before us.

**Law of Opportunity** - When you are unconditionally ready for something, the Universal Consciousness or God Consciousness will make that Opportunity known, whether realised or not by the viewer. The Universal Mind will bring that situation, information or circumstances right before that person or persons, whereby the conscious mind must first become aware of the information, analyse or assess it, feel into it, in terms of its relationship to the person or people. Only when it becomes a Heartfelt choice to accept that challenge, and it will be a challenge, as nothing is assumed in the Reality of God, All is Tested 3 times before any form of Reality or Healing can be regarded as Proof of Engagement and Commitment to succeed in that Opportunity to Transmute, Transcend, Transform or Transfigure such Aims and Goals into a Greater or indeed Total Balance of God Life. No half-hearted ego personality choice to accept that as your opportunity to change something within your inner and outer world for the Greatest Good of All Concerned will do it. Such attempts are Not through Divine Will, rather they are begun within the realms of the ego's free will. Anything begun or continued within the personality of free will, is destined to be fraught with obstacles, resistance, struggle, defiance, opposition and conflict. Unless a Wholehearted approach to the Success of such a Commitment and Devotion to that perceived 'Cause for Opportunity', Now Seen, Acknowledged and Accepted as a 'God Cause For The Opportunity' to Engage in Divine Will, is taken that Opportunity Given, will once again depart and dissolve away into even greater need for another reason, another opportunity, greater than the one before. And when that happens, the next Opportunity will require even Greater Energy Reserves to advance, for that next Opportunity will come from larger intensities of the same dramas, that instigated the reason for Resolution for that of the purpose of the Opportunity before given.

Continued over page.....

These are but a few more Cosmic Laws that could be used to understand more clearly this very specific *'Third Peril Prophecy'*. It would appear that America is facing this time of Prophecy *'Now'*, and America as a Whole Nation, must come together more Democratically in a more Unified manner, on all levels of government, and within the Ranks of the **'People of God'** to make decisions to dissolve this old pattern of Consciousness. This is an American Opportunity for the People Given By God! What America does with this Opportunity will be down to them, Government and the People! Here is where the Power of the Now Moment is Placed. To wait until any future time to make such decisions may allow that *'Third Peril'* for America to play out. The Destiny Of America is Now not in the Hands of the Sages or the Secret Mystery Schools, but in the **'People of God'** on the Ground, there in the quagmire of present human relationships across the world!

**The Law of Harmlessness** - The Higher the being, the Greater its Expression of Harmlessness, the Wisdom Aspect of the Soul must also direct Harmlessness as a result of Love and Compassion, or else it may end up violating the *'Law of Self-Preservation'*. This is one of the Laws pertaining to Soul-growth. In Sanskrit Harmlessness is called *'ahimsa'*; it is one of the requisite Divine Attributes or Qualities that the Disciple has to embody. In order to possess Perfect Harmlessness, one must be Pure in Body, Mind, and Soul; one must Evoke the Aspect of Love and Compassion of the Spiritual Triad or the Higher Self to dwell in the personality, the lower self.

**Law of Preservation** - God Created all living things to live life to its fullest.

**Law of Self- Preservation** - One of the most important Laws in immediate operation in the lives of all life-units, all organisms, physical or non-physical, is the *'Law of Self-Preservation'*. Every life-unit is striving to maintain and sustain its existence at some level and attempting to exist on a Higher Spiral of Being, a Higher Life Expression. Going contrary to this Law, as in suicide, for instance, where the desire is to terminate self-existence, is a choice that opposes the Laws of Nature. At a lower level, the body of an organism is identified as the self; thus, self-preservation at this level entails preserving the body from harm, death or extinction. Some strains of viruses, though inimical to man and woman and struggling against the attempts of men and women to destroy them, are simply obeying the natural *'Law of Existence'*.

Fundamentally, all life-units have a right to exist, so long as they do not encroach upon the existence of other life-units and disturb the harmony of the Universe. At a Higher Level, from the Spiritual person upwards, although encompassing the lower aspects of Preserving the physical vehicle from harm, self-preservation also implies preserving or maintaining the awareness of one's Real Self, one's true identity, one's Divine Spark at the level of one's mundane consciousness. In contemporary mysticism, this level of consciousness is called *'Cosmic Consciousness'*, or the *'Sankalpa Samadhi'* of the Hindu Yogis.

**Side Note:** *One of humanity's greatest travesties in life, is the overwhelming numbers of Dear Souls who should never be placed into a position of taking their own lives, where their feelings of hopelessness become an intolerable feeling of 'being un-Loved'. A Solution to this is urgently required, as such Karma is not just a matter for the one leaving the body in this way, but also for those who push them to that state of uncomprehensible choices made. Nothing is more harmful in this area of the suicides of young people, than the technological and AI devices and programming that promote negative states of consciousness of self-loathing! Whether knowingly or unknowingly, all will be held accountable, and there are no exceptions to this 'Law of Accountability'.*
