

# The Cosmic Law of Attrition

## As Defined by St. Germain within the Discourses of the True Constitution

*Briefly defined the Law of Attrition is the process of reducing something's strength or effectiveness through sustained attack or pressure.*

This Law is one of the Laws that relate or belong to the 'Laws of Existence' and hence can and does create many varying types of negative influences upon human consciousness. And when deliberately used can be most effective in creating disempowerment. Those who intentionally employ this Law use it to maintain power and control over others, and when wrongfully applied it brings imbalance and disharmony and can equate to far reaching results as in the recessions of this world and what is coming to humanity once again that will result in similar conclusions. When used in a negative and intentionally harmful way, such applications can reduce work forces in all forms of life in society. It can be used to reduce wages and increase costs to keep the people limited in their effective needs to live a healthy and free life. It can cause losses in all forms of the human experience; it can also remove people from positions in society and replace them with more experience or more agreeable ones to the business owners. Some religions use attrition placing it over the false belief in sin, to wear down their congregations that in turn, subject them to disempowerment and hence the need to remain tethered to that church or belief system! Read the 'Christ Letters' to see how attrition was used toward the use of the 7th day!

Attrition can also be applied to people who leave an education or training course before it has finished, thus resulting in a waste of energies and resources. It can also relate to the reduction or decrease or demise of personnel, membership, inclusion, association, affiliation, relationships or participation in numbers, size or strength to any group, community, or the Gathering of a 'United Forcefield'. Attrition can also be applied to the wearing down of other physical things that occur either naturally, such as earthquakes or by intentional physical action, such as manipulated and planned wars.

To understand Attrition, one needs to understand Evolution, for without Attrition, Evolution cannot take place. It is a Divine Process that allows for and calls for change! Change to remove that which is old and to allow that which is new to come into play or the Awareness of an Ever-Expanding Consciousness! So, Attrition removes old concepts and opens the way for New Concepts, New Ideas and New Visions for Humanity to grow, develop and move Higher in Awareness. So, while Attrition can seem negative and does indeed create hardships and chaos for many and in the time to come for the whole of the human race, it too has its Divine Purpose. It is not wrong in terms of human experience. It is necessary to expand human experience by replacing what is old to allow the new to bring about Higher Consciousness and a Better Quality of Life and Freedom of Spirit. Many will fight it, as the dark energies are doing right now, as they know their powers are about to be taken away from them, for these entities are not the consciousness of the mass of humanity. They are just a minority who think they know best and see humanity, not as God Beings, but slaves and workers to their own agendas. But that is not what the Human Race is for, nor ever was meant to be.

**So, the Law of Attrition, although it may appear to be that which takes away, is, on the other side of the definition, that part of the 'Law of Life', which is the process of expanding people's Strength or Effectiveness of Being through Sustained Change in Consciousness for the Divine Purpose of Greater Truth, Quality of Life and Freedom of Spirit. This Law is all Governed by the 'I AM' Presence, in Allowance, Knowing that what is seen is just the illusion of miscreation being Corrected by the Divine Impulse of The Cohesive Power of God's Love!**

I told you in My previous Discourse, God has the Answer to every problem. And even this global scale of a problem; the answer is made manifest in a way that is for the Greatest Good of All Concerned. And you are part of the Solution to Resolve this massive problem. Remember then Dear Hearts, pain, and suffering, even death is but an illusion and within this holographic expression of the chaos, now in your world, it is not about the physical manifestations, but the Ever-Expanding Consciousness that does not die, does not hold onto pain or suffering. It is about the Divine Expression of God Life, from the most distasteful to the Most Loving and Joy Filled! This Evolutionary World will one day pass also and what will remain shall be Glorious beyond measure! Only the Master within you will Know this!

**There is Always Room For Change!**
