

## Part 18 - Rule 1 - Rule Study Program - EGA

---

### INDIVIDUAL AND GROUP RECOGNITION - DJWHAL KHUL, 6<sup>TH</sup> OCTOBER 2018

Welcome, Brothers and Sisters of the Way! I have come today to each of you to give you a wider perspective from that which you may have already gleaned from your short but intensive experiences with Rule 1 for Group Initiation.

This September, Group, who has negotiated the 1st Rule for Initiation of the Group Antahkarana as a Group Initiative, has had the highest percentage of Disciples who are not following through into the balance of the 13 Rules to complete the Study of these potentials to date. This is understandable from the individual perspective, for we know how life continues to direct the ego personality in an effort to maintain control and away from the Divine Purpose of the Evolution of Mankind. This is a millennial-old problem and one that continues to sway both individuals and groups from making choices that will alleviate the problems of the world for the Supply and Service to a World in Need on so many national and international levels.

For those who have already left the Rule 1 Study Group and not continuing with the balance of the Rules, I tell you again, as I said in My very first Introduction to the Rule 1 Study Group, and that you were invited to read as part of the Preliminary Information before entering these studies;

“I come today to set a precedent for you, to become more aware of the parameters and fundamental attitudes that will be either a result in the failure of this group experiment or the success of this endeavour. Do not be dismayed at this comment, for I tell you only deeper contemplation shall reveal its Truth. Allow Me to Guide you toward a greater understanding, so you may discern for yourself more clearly, this Truth.

“I say failure, not in a way that would indicate, or even consider your engagement herein, as a failure of your individual efforts. For even if you complete this Study, remembering nothing, feeling nothing, it shall still provide a Consciousness Seed that shall provide effective and expansive encodements, triggers that will be activated at the right times within your progressive development nonetheless. However, We Know Who is here, you are not here by any happenstance, and We do foresee all of you participating for the duration of the 10 days. That is all that is being asked of you at this time. After that period shall come a turnpike (if I may use this analogy), and there shall be a number of slip roads one can take if they do not choose to continue upon this Highway of Initiation.

“The failure I refer to also represents the Group dynamic, the mixtures of the Rays and their Qualities and Virtues. Should you be unable to complete this task for any reason, either consciously or not; (i.e. objectively, subjectively, transferences energetically, and figuratively speaking), fear not for a personalized learning shall be provided as your reward, a Gift in the Giving!

So, although you may consider your retirements as failures or found other priorities that allow you to feel you have not achieved what you set out to attain, but I tell you, you will come to a realization at another point, as life will lead you where you will feel drawn back to look at this opportunity again. Why? Because even in this short Study period, you have received Seeds of Consciousness that shall provide for you effective and expansive encodements that will, when the time is ripe in the future, trigger your consciousness once again.

For those who are continuing and those who may read this Discourse in the future, I am now going to address some points that We, within the Hierarchy, feel would be of benefit to you by grasping a deeper understanding of why you have been led here and why these Rules are so important, to not only you but all the New Groups of World Servers.

I have called this Discourse ‘*Individual and Group Recognition*’, and this shall be the foundation from which I shall now speak! The Rules for Group Initiation were created to offer humanity a clear and precise Knowledge of a Practice that will assure those who place their focus and attention upon it and who, through its Daily Study, can walk a more Centered and Repolarized Life. The idea here is that through these understandings, one can change his or her attitude toward that which makes up the material forms within their general world around them.

This then allows for the changing of one’s mental programs and belief systems to the point whereby he or she is no longer working from a delusional state of consciousness and thus beginning to move forward from a Clear Foundation of Knowledge, which then begins to set him/her free from the lower life perceptions. It is only when these Higher perceptions are Self-Realized that the true Light of Day is seen! One will no longer walk a path of illusionary awareness but one where the subjugation of the personality has been attained.

This takes practice and persistence, but most of all, it takes a commitment, first to Self and then to the Group Life. These Rules For Group Initiation are not easy to understand and even harder to put into practice, however, it can be done, and has been done, where the individuals who agree to partake within such a Group Environment pay close attention and consideration throughout the day as to the use and misuse of energy. Every man and woman should realize that in the use of energy lies direction and the treading of the Path. It produces, eventually, truthful manifestation and the displaying of one’s *Light* in order that circumstances may be irradiated and Brothers and Sisters, Family and Friends can be helped along their Paths in Life!

Disciples and Initiates alike should familiarize themselves with the '*energy model*' and learn to regard themselves as 'energy units or Beings' displaying certain types of energy. In this unification, it should be borne in mind that when Spiritual Energy and material energy (the two opposite poles) are brought into relationship with each other, a third type of Energy is produced, and the Work of the fourth or Human Kingdom is to demonstrate this unique Energy Form. The Prime example of this is Jesus The Christ when He walked upon the Earth.

In the Perfect Manifestation of these three will the Plan of Creation be consummated within man and woman, and when this is done, so too shall the New Christed Beings step forward! It should also be borne in mind that these three are nevertheless a manifestation of *duality - Spirit and matter* - and that this is the manifestation of a Great Existence and of the Christed Ones Appearing. It cannot be done any other way here!

To date, within the Study Groups, this combination of Energetic usage has not been seen to any degree due to the lack of recognition/interaction and awareness with or by its members of the other members within the Group. Traces are seen, of course, but it is not until the Participation of a more Focused and Concentrated effort that follows within the continuation of the 13 Rules Study and in everyday life that this begins to manifest in a much more tangible way! A way that allows for the Energy to be a more Unified dynamic Flow of Individual Consciousness and Group Union! But still, this is stifled by innumerable distractions away from the Study material with subject matters that really are not required beyond what the Study is offering.

It is important for anyone who wishes to step closer to the Christ Consciousness, the less focus on what others are doing and more Head/Heart Centred emphasis, attention, concentration, application and effort be placed upon the Self, that is, the Holy Communion with One's I Am Presence. The God Within! While one continues to seek outside of self, the more opportunities are given to diffuse the Energies of Spirit and material that will, when blended within, produce the third type of Energy, that of Holy Union with the Godhead! We tell you, until the unification is attained of the Dynamic Re-Union with your Higher Self, Christ Consciousness shall be delayed.

Allow Me to be very clear so that no misapprehension can be made here, to attain the Goal of Christ Consciousness as a Fully Embodied Human Being. One must apply all that is required to attain the Highest Degrees of Knowledge and hold it with the Head Centre! I have explained this in detail within the Alice Bailey Book, '*The Rays and Initiations*' and made very specific directions to it in My Introduction as Preliminary Remarks before beginning the Studies of the 14 Rules.

In Confluence with this Higher Knowledge, and that is all included within the process of Building the Antahkarana, one must achieve the direct Communication with the 'I Am' Presence within.

You will notice as you make your way through the remaining 13 Rules that a new Technique of Application for the Construction of the Antahkarana through the use of Visuals rather than the older techniques based on older conscious awareness that have been used in the past is present. For those who may see this as an approach that is not indicated within the Alice Bailey Books, I will tell you this.

When the Information with the A.B. Books was given, it was principally transcribed within the resonances of the day, the need of the day, if you like. Since then, the consciousness of mankind has changed, and the needs of mankind have grown in different ways. Today within the new resonances of humanity and more so with those within the Groups of New Servers, We have found the need to expand and adapt many aspects of the old consciousness, practices and techniques of applying the Foundational Facts that have not and will not change that form the Foundation of all the A.B. Books. Today We are listening to the Human Disciples and Initiates and learning from them, and opening to those new applications and techniques that are proving to be far more effective than older ones.

It is also much a human dilemma within the problems of the world. For in the years the books were written and the information that was based around the problems of the day, today, a whole new realm of problems is present that have no relationship to those within the postwar period. In particular, we refer to problems that interfere with the children of the world, world economies, food production and world governments. The advent of computer technology and the internet have created far more deep-seated problems and far wider spread than in the days of the postwar! So, to accommodate such changes, We, the Hierarchy, must also change, and We are constantly looking for the advanced thinkers of the New Groups of World Servers within humanity and what they are seeing and feeling there upon the ground. What is clearly not understood within Humanity is that the Hierarchy principally reside and holds the Higher Consciousness, and as the Elemental Grace Alliance has shared within its Discourses, sometimes Higher Beings lose the reality that humanity has to deal with, and Hierarchy, many of which have never incarnated as a human Being do not hold the Compassion for humanity that is NOW needed.

That is why the Christ through Jesus was sent to Earth 2000 years ago, for it was His Mission to anchor Love Through Compassion into the lives of humanity, but not only that, into the Hearts of Hierarchy!

We have told you numerous times, The WHOLE of God's Creations are Evolving within this Solar System and beyond, and it is Humanity, The Supplementary Seven, thereupon the Ground that have been given the Roles to Create this Evolutionary Path for All! But as human beings, you will not do this without the Full and Dedicated Applications of the Cosmic Laws and the Implementation of these 14 Rules for Group Initiation. Individuals can not do this on their own. The Batten Jesus brought with Him to Earth has been given to The New Group of World Servers. And We, as Shamballa, Hierarchy and Humanity, are All here to Support and

Assist you every step of the way! It is within the Interest of more Universes than you could ever imagine.

Think on this, Dear Brothers and Sisters, and take the time to make that Connection with Self, these Rules will assist you in a way you cannot comprehend from where you are right now, but you will if you begin to Recognize yourselves as the Individualized Expressions of God's Truth and in turn Recognize the Benefits of sharing your Energies with a Group of Like-Minded Dear Brothers and Sisters, who Know within like you do! The only way forward from here is to pay closer attention to God Life!

Have a wonderful Study, and Know that you are Guided all the way! It will test your resolve; it will stretch your abilities to understand or even remember. It may prove overwhelming as it digs deep in you and brings to the surface all that no longer serves you for release. It may even be painful with the memories it draws to the surface, but know, the more you Give It, the Greater the Focus of your attention and recognition of those around you, not just in the Group but your life in general, the more you shall Receive from It!

For the Greatest Clarity, become the Observers of your Life and not the participants! Use the Knowledge through your Heart Centre, learn to read your own bodily feelings and emotions, and this will all help you over the next 130-plus days!

One last thing! The Energies of the Day are now so powerful that your very thoughts are virtually manifesting what you think instantaneously! Be careful what and how you are thinking! This may save you a lot of torment, angst and anxiety! Keep Divine Love and Joy at the forefront of EVERYTHING you do!

I Am Djwhal Khul in Your Service.
