

Series 2 - Part 14 - Divine Economy

GETTING TO KNOW RAYS 1, 2 & 7 - MASTER RAKOCZY, 15TH DECEMBER 2019

Based upon the Work of Lucille Cedercrans. www.wisdomimpressions.com and The A.A. Bailey Work with DK, the Lucis Trust <https://www.lucistrust.org/> and further Divine Impressions of thoughts and feelings from the Masters of the Ashrams of Divine Synthesis to the EGA through the 7 Rays, but specifically Rays 1, 2 and 7.

MASTER ROKOCZY: Greetings, Dear Ones. Much that I have to Project here tonight also, in this Orientation Opportunity, simply will not be understandable to a few of you until after you have had the Opportunity to receive more basic training. However, I Am asking you to be present for these Instructions for two reasons:-

1. If you can be receptive even if you are not understanding the concepts, particularly the technical instruction which is to be projected, it will nonetheless make its Impression and will unfold within your Consciousness as you proceed with your more basic training. This will, over a period of time, concentrate a great deal of information, a great deal of Wisdom for which you are ready (*or I would not permit you to sit in on these classes*), so that as you complete the more basic training, you will find yourselves able to work with the others, with the understanding and the facility which you do not now have.
2. During a Projection of this kind, those of you who are receiving it are also receiving Higher Frequency of your astral-emotional and your Etheric physical instruments. These effects are extremely important for the right working out of Divine Purpose and Divine Plan for this Group. Therefore, this is another reason why I have included you in this Class at this time, and if you can bear with it, you will find in a few weeks that the going will be much easier.

Rays

It is necessary for Me now to project technical instruction regarding the Synthesis of these Energies with which you have been familiar as differentiated Ray Expressions. You will find that carrying a Synthesis of One, Two, and Seven is much different than carrying either a combination of the three or of one or two of the Energies. You will find that the characteristics and qualities of each of these energies, while they are basically present within the Synthesis, are nonetheless in themselves, as basic characteristics, recondite to and productive of a new and different characteristic and quality, which is that of the Synthesis itself. To even approach an understanding of the Synthesis, it is necessary for you to bring into your own Consciousness as much as you already know of these three Rays and, from that Knowledge to move up in Frequency to the Second Cosmic Ray of Divine Love-Wisdom, or Pure Reason, of which these three are subsidiary. For it is only through an understanding, at least in part, of Pure Reason, to which these three are subsidiary, that the Synthesis of them can be approached in understanding. I Am going to ask you because there is still much within your consciousness that is a distortion of Truth regarding them (*even though you have been*

discussing these Ray Energies and their expressions over a certain period of time, and have to a degree, been working with them, have become familiar with them). There is a certain amount of glamour (*I have to add, a great deal of glamour in some cases that continues to be present*) regarding the various Rays and their outer expression still.

A Ray actually is an Energy Expression of Light, an Energy Expression of Divinity, of which there are Seven Major Rays in any particular System of Life. When We speak of the Seven Rays in this Planetary System, that means they are the Seven Energy Expressions that function and operate within this particular Planetary System of Life. There are the Seven Solar Rays, again, which are the Energy expressions which operate and function within the Solar life and so on in the Cosmic sense. All Energy below the Cosmic Level are Sub-Rays of One or the Other of the Cosmic Rays. The predominant Ray Energy in our Solar System is that of the Second Ray, Divine Love-Wisdom. All Rays, in the Planetary sense that we are able to contact are subsidiary to that Second Ray.

As Energy expression, this means that everything is made up of a combination of three or more of these particular energies, usually five in combination. Each Energy has its particular characteristics and its particular qualities because each is impressed with a particular Divine Intent. These Rays are named according to the intent with which they have been Impressed.

I would like to remind you that the highest definition of the First Ray that has been formulated within this Planetary Ring-Pass-Not is that the Purpose of the First Ray is to bring into Focus and to interpret the Cosmic Ray of Divine Love-Wisdom or Pure Reason so that in the Higher Frequencies of First Ray are to be found within this Planetary Ring-Passeth-Not the Highest most focused expression of Divine Love.

There are a few points I should like to bring out here regarding the Second Ray of Divine Love-Wisdom. First, Divine Love is not an emotion. It is most important that the Disciple realizes this. It does produce, as do all energies, a feeling response. But in itself, it is not an emotion. It is an Energy, and, I might add, it is a Consciousness. Its Highest Frequencies manifest as Wisdom, Divine Love is Divine Wisdom, Perfect Understanding. The definition of Divine Love, more than the definition of any other Ray Energy, defies logic. Its understanding cannot be reached through the use of the logical interpretative mind. A True Understanding of this Energy can only be achieved via an experience in Consciousness of it.

As I speak to you, it is through the use of this particular Energy. You, in turn, are receptive to it by your reception and your response. A relationship is established between us, a relationship which produces within both your Consciousness and mine a greater understanding of one another, of ourselves, and therefore of that One Life of which we are but a part.

The Disciple enters into this experience of love through the use of the First Ray by Focusing the Intent, the Will to Love, recognizing that the basic Energy underlying every relationship, regardless of the outer form of that relationship, is Divine Love-Wisdom. And by truly entering then into the Energy of the Relationship, the experience of Love, the experience produces understanding in ever-increasing degrees until the Disciple enters into the Heart of the One Life and Lives within that Heart regardless of his outer movements in time and space.

The True Path of Understanding, the True Path of Evolution, of Service, of one's own growth, is found always ready to be known in the relationship, which it is his or her good karma, in every instance, to experience. By entering into the Energy of the Relationship, regardless of the outer form it takes, and resolving the mystery of the relationship, man comes to Know God and, therefore, to Know him or herself.

For some reason, it seems that the Seventh Ray is the most difficult Ray for Disciples below a certain degree of Initiation to understand, and yet it is the one with which they are the most familiar and the one with which they have had the most experience throughout their entire Cycle of Incarnation. It is the Energy today, during this transitory period in the Evolutionary Development of humanity, which brings the greatest Opportunity.

It is the Energy which is today most predominant within the world of affairs. I should like you to understand that while this Seventh Ray is the New Ray of Civilization, still, it is not a Ray of Aspect but rather one of Attribute. The First and Second Rays of this New Synthesis are Rays of Aspect.

The First Ray is an Expression of the First Aspect of Deity, that of Divine Purpose, Divine Motivation. The Second Ray is an Expression of the Second Aspect of Divinity, that of Consciousness, of Being, the Self-Aspect, the Christ Aspect.

And the Third Ray is the Expression of the Third Aspect of Deity, that of Intelligent Activity. Prior to this transition between an old and a New Age, civilization was predominantly a Third Ray Expression, an Expression of Intelligent Activity within the form nature. The Seventh Ray found expression in primitive culture, primitive race, in their ceremonies, in their attitudes, and so on, but was never built up into the Higher Forms of Civilization, the Higher Cultures, until this period into which humanity is now transiting.

The differentiation between the Third Ray and the Seventh Ray is, at first, very hard to find, very hard to perceive.

The Third Ray upon which civilization has been constructed, the Ray which has been predominant in the building and the expression of civilization (and therefore has contributed so much to the Evolutionary Development of humanity thus far), is an Energy which expresses itself very logically. It has produced the present mathematical sciences. It defines, depicts, in logical sequence, presenting an appearance of order out of chaos. This is the expression of Intelligent Activity.

The Seventh Ray expresses without regard to time and space, and this is the basic difference between the expression of these two Rays within the civilization. The Third Ray demands that the working out from the subjective into the objective must follow specific, defined steps that make their appearance, each one in the physical Plane of affairs. The Seventh Ray Expresses Itself without regard for this sequential manifestation of each step or each sequence which results in a final appearance.

The Seventh Ray follows its own logic, so to speak, but is Governed by several Cosmic Laws working in relationship to one another. One of these Laws is the Law of Periodicity. The Seventh Expressive, to a certain degree of it, follows in its manifestation of appearance a

Cyclic motion which does not account for, or necessitate, the physical appearance of that subjectivity which rests between the intervals in the cycle of this expression.

The Third Ray would demand, instead of manifesting periodically, that everything subjective would come into objective manifestation before there could be an appearance of the final result. The Seventh Ray doesn't do that. It demands manifestations only at a certain point of a cycle. That which is subjective between these two points does not have to come down and manifest in a sequence. You see the difference. It can utilize the Law of Periodicity and manipulate Energy, Force, and substance in such a way that it isn't necessary to become that *'1 and 1 and 1 and 1 make four', or that '2 and 2 make four', or that '3 and 1 make four'*, in order to manifest the appearance of 4.

Therefore, this characteristic gives the Seventh Ray expression that appearance, that quality, which has been defined by many as magic (*the ability to manipulate subjectively, Energy, Force, and substance of the Rays of Aspect, Life, Quality, and Activity, in order to produce an appearance*). To the human being, the expression of this Ray seems to be magical, supernatural. It cannot be understood in action by present-day physical science.

With the civilization transiting from the Expression of Third Ray to the Expression of Seventh Ray, we find many opportunities manifesting, many crises of opportunity. For this, Energy comes into appearance only during those cycles wherein rapid growth is predetermined by the Planetary Logos. The Seventh Ray is the reflection of Spirit, or the First Aspect, in Substance. Now, I would have you consider your own almost unconscious use of these Energies from the time you became interested in your evolutionary development, in the processes of the mind, and their relationship to the working out of your purposes and Plan, whether right or wrong in time and space. The moment that the conscious thinking entity becomes cognizant of the fact that he or she is, by reason of his or her own mind, creative of his or her own destiny, whether to a great or a small degree, he or she begins, unconsciously at first, to utilize this Energy and to be used by it.

In one sense, this Seventh Ray Energy is one of the most important energies for you to understand because it is this expression that you will meet in your outer efforts to be of Service to the Divine Plan for humanity. You will meet it in its positive and its negative expression. The positive expression of the Seventh Ray, insofar as the Disciple is concerned, is that of White Magic. Theirs is the ability to manipulate Energy, Force, and Substance to manifest those forms in the world of affairs which carry the Divine Plan for humanity into outer manifestation. His or hers is the ability to wield his mental, astral-emotional, and physical influence in such a way as to deliberately effect a greater growth and development of Consciousness for those with whom he or she comes into contact. This is Seventh Ray work on the positive side of the scale.

The negative expression of the Seventh Ray is the opposite, the use of Black Magic as the individual seeks to serve his or her own separated purposes and goals, or the use of Black Magic by the Disciple of the Black Lodge for the purpose of opposition to the Divine Plan for humanity. You will meet with both expressions of this Energy, and it becomes ever more necessary for you to learn the Right Use of the Seventh Ray in your own life and affairs, both

as they pertain to you personally and in your Service Activity. The Magic of the Seventh Ray brings the Purpose and the Love, the Life and the Quality of God, both Transcending and Imminent, into outer appearance.

New Synthesis

We have discussed the three energies which are being blended into a new Synthesis for the purpose of working out this Ashramic Plan in the world of affairs. Your Ashram, the Ashramic Centre which brings the Planetary Purpose into focus and which, via the Energy of love, interprets that Divine Purpose into a Plan and passes that Plan on to you to be worked out in the life and affairs of mankind, is constituted of three members of the Hierarchy with whom you are aligned in a direct inter-relationship, both as Soul and within your instrument in the physical Plane of affairs.

The Master Maitreya, the Lord of the First Ray, the Master Djwhal Khul, a Senior Disciple of the Second Ray and Myself, the Master Rakoczy, Lord of the Seventh Ray, bring these Three Energies into a Focus, a Triangular Focus on Ashramic Levels. Via a circulation within that Triangle of Spiritual Force, we blend them into the New Synthesis which has as yet just barely touched you but which will, as you, in your increasing receptivity, become more able to carry it and to express it in service to the Divine Plan for humanity, come into appearance and influence in ever-increasing quality and quantity.

Even though the New Synthesis has been created out of the First, Second and the Seventh Rays, it is new in itself and has its own particular and peculiar characteristic Impressions in the world of affairs during this period, is to bring about a Synthesis of all truth which lives well within, and moves through the many forms which house that truth regardless of how apparently in opposition the forms may be. This is its intent and purpose, to step such a purpose down into further effect. It is to produce through its Synthesizing action the evolution of the human consciousness from its prison of the separated persona identification into identification of Soul with the experiences in Consciousness of At-One-ment in the Group sense, which is attendant to Soul Consciousness or Soul Identification.

In other words, through its Synthesizing action, the individual breaks through his or her ring-pass-not to achieve an at-one-ment with others at his or her own particular level of development, so a True Group Consciousness can be known. This is one of the immediate steps in the evolutionary process.

The major characteristic of this new Energy is its dynamic, precipitating faculty. It is the Precipitating Agent of the Divine Plan for humanity in specific circumstances and situations, in specific happenings. The Disciple will use the Energy by focusing it into those situations and circumstances which should be the vehicle for the manifestation of the Plan but are not necessarily so at that given time. By focusing this Energy into this specific situation or that circumstance, even though that happening appears to be in opposition to the Plan, the Energy itself Precipitates the Divine Plan into manifestation via or through that Specific happening.

This quality will be, at first, very difficult to differentiate from the Quality of Love Itself, except that there will be less emotional response to the Quality, more mental response, and

therefore a growing development of what is known as Compassion. The quality is brought into the Consciousness and the instrument and will develop the Intuitive faculty of mankind, but more than anything else, it will aid in the development of what is called '*empathy*'. It will make it possible for one individual to empathize with another and yet, free him or her from that sympathetic relationship which results in emotional disturbances, whether positive or negative, of various kinds. It will then aid in lifting man's concept of love and, therefore, their expression of it into the mental realm.

I am going to again ask you to consider those three words which have been used to define the Three Aspects of Deity, Life, Quality and Appearance. Contemplate these words in relationship to the New Synthesis, realizing that in that Synthesis Life, Quality and Appearance are one. In that Energy, these three are Synthesized into One.
